AutoCAD Crack [Win/Mac] [2022]

About AutoCAD is the world's leading 2D and 3D CAD program and is used by over 25 million users worldwide. It is used by 3D artists to draw, paint, and animate models and by architects, engineers, draftsmen, and designers to prepare technical drawings, CAD models, and project information. The software is designed to ease the design and drafting process, and as a result, is considered a drafting program (hence the name AutoCAD). The product was originally targeted at users working with 2D drafting, but has evolved into a full-featured CAD program, with functions to create and modify technical drawings and 3D models. The software is cross platform and can be run on a variety of operating systems, including Windows, macOS, and Linux. History AutoCAD was initially released as a desktop app for 8-bit microcomputers in December 1982. This was the first application to enable CAD operators to operate from the same computer terminal, and as a result, AutoCAD was the first commercial CAD program to be widely used in the architecture, engineering, and construction industries. AutoCAD was first distributed on disk, then on microcomputers running the IBM PC BIOS. In 1983, it was released on the PC version of the Apple II and MS-DOS for Apple Macintosh and IBM PC users. The first version of AutoCAD, Autodesk AutoCAD 1.0, included the following features: Autodesk AutoCAD 1.0 - 1983 Autodesk AutoCAD 1.5 - 1985 Autodesk AutoCAD 2.0 - 1986 Autodesk AutoCAD 3.0 - 1987 Autodesk AutoCAD 3.2 - 1989 Autodesk AutoCAD 3.5 - 1990 Autodesk AutoCAD 4.0 - 1991 Autodesk AutoCAD 4.5 - 1992 Autodesk AutoCAD 4.5 was the first commercial version to allow design professionals to produce sophisticated drawings. Autodesk AutoCAD 5.0 - 1993 Autodesk AutoCAD 5.0 was the first version that used color and had a graphical user interface (GUI). Autodesk AutoCAD 5.1 - 1994 Autodesk AutoCAD 5.1 was the first major revision of AutoCAD, introducing 3D

Q: Android - Load Facebook Profile Photo from URI I am using below code to show the Facebook profile picture: Intent intent = new Intent(Intent.ACTION_VIEW); intent.setData(Uri.parse("" + userId)); startActivity(intent); and now I need to change this to load it from URI instead of hard-coding the URI in the code. A: You can not do this with what you have there. You can either pass in the URL directly, or if you want a Uri that you can get from a Facebook API, use something like the below. final String[] projection = { "fields" }; final String selection = "fields=id,picture"; final String[] selectionArgs = { "1",
