Since its acquisition in 2007, Paessler has been the world's leading provider of software solutions for the optimization of network services. The Paessler Network Performance Solutions (PNPS) software family is perfectly tailored to test, monitor and manage the

performance of services offered to end users on top of LAN/WAN networks. PNPS offers state-of-the-art solutions to support in-depth tests, measuring and optimization tasks. It is able to generate comprehensive and analyzable test reports that can be used by network administrators and service providers to identify, and then improve, issues that may negatively impact end-user experience. We would like to thank a specialized community of certified network professionals who reviewed and provided feedback on PNPS. This feedback has been instrumental in the development of new features and enhancements to the product. Today, a number of third party tools are also available that aim to complement PNPS in

addressing network performance issues.

While their level of functionality and customization capabilities may differ from PNPS, they are complementary products that are able to meet the needs of different users and scenarios. We invite you to explore the extended product features and functionality, by visiting the following sections of the PNPS site: We would like to thank a specialized community of certified network professionals who reviewed and provided feedback on PNPS. This feedback has been instrumental in the development of new features and enhancements to 77a5ca646e

KeyM macro (Keyboard Macro) can be a very useful tool when you are creating the forms for the applications. This keyboard macro feature is one of the most commonly used features in MS Office. It is used to generate and insert keyboard macros. KeyM can be used to create keyboard macros and insert them into a Microsoft Word document. It also enables you to create your own customized keyboard macros. Macro, also known as keystrokes, keyboard shortcuts, or macro keys is a software command or series of commands that automate an operation in a computer. KEYMACRO is a free macro utility for Windows that enables you to

create and execute macros and keystrokes. It has built-in support for Word, Excel, and Access, and you can also create macros for any other application. KeyM can be used to create macros to automate repetitive tasks such as copying and pasting text, formatting sections of a document, find and replace text, copy cells to and from an Excel spreadsheet, and a lot more. A simple way to create macros in any application, in a single mouse click!
