Capture your paper documents to file using the VRS standard. Use Capio to instantly capture documents to a handy PDF, TIFF, JPEG or PDF format for easy capture, viewing and sharing. It's the easiest way to get that document you need to get to the next step. I learned many, many years ago that you do not need to lug mountains of index cards around with you. Everyone has a paper trail. From bank statements, home invoices, pay slips, company applications, estimates, proposal, memos, schedules, notes, receipts, you name it. You have your own filing system. In business however, trying to find something is like

nailing Jell-o to a tree. One man's filing system is another's nonsense. How do you know what is stored where? How do you find what you need when you're out of the office? Trying to file? Using a desktop scanner? What if you need another copy of that document? What if that printed document you just received has a mistake on it? After you finish digitizing the document, how do you send it to the customer/ client/ boss? What if you need to pay for it? What if you need to track it? What if you need to keep track of other documents from that same business? What if the customer/ client/ boss wants a hardcopy of it? Scans are time consuming. They are prone to accidentals and mistakes. They require the use of a computer. They do not tell you what is recorded. They do not contain any of the file creation information. The information on the hardcopy is crucial. Hello! As you already may know, I'm the creator of Capio. Capio is a software which allows you to easily capture paper documents and import them into your PC folder. Capio also allows you to organize your saved files, group them into folders, and quickly search them. In this

article I'm going to share more on the Capio feature called "VirtualReScan". VirtualReScan and Capio If you have experienced scanning paper documents with a scanner, then you probably know that there's a difference in the image quality of the scanned documents depending on the scanner that you're using. "Oh, but that's a low-quality scanner, it can't do that!" the person on the other side of the phone will say. b7e8fdf5c8

Scan and organize your own business documents, as well as 3rd party documents, while maintaining a simple filing system. Capio collects all incoming and outgoing documents, and can store them, index them, print them, file them, share them and even recover them from your computer hard drive. Capio can capture documents in fax, paper and email formats. Capio can index its own documents or use "stubless" indexing, in which users save a dynamic index to an XML file that can be built and modified in non-collaborative fashion. Capio looks for XMP metadata and captures visual data. Capio can also search for text and language. Capio (Capturing Personal Documents with VRS) is a productivity tool that enables users to capture their own work documents in PDF or TIFF format and store, index, view, retrieve and archive them on a PC or an Ascent workstation. Capio requires no administrator's support; it works seamlessly with the current Windows 7 operating system. Capio supports both paper and electronic capture of

business information. Capio supports XMP metadata capture and includes an extensive library of visual metadata tags. Capio captures and indexes text and language with a built-in dictionary. As long as there is sufficient input, Capio captures all content from a variety of sources. Capio is also built to integrate with external and on-premise applications like Ascent and Kofax, and with Kofax's Essential Suite, the industry standard for e-signature in the financial industry. Capio supports: ? E-mail and fax capture from an attached network file ? Paper capture from paper and card sources. The capture document selection process is fully configurable. ? Integration with Ascent Capture ? Integration with Kofax ? Integration with Kofax's Essentials Suite for e-Signature, e-Filing, e-Discovery and e-Billing ? Integration with Deft ? Integration with OCR solutions ? Integration with XMP (metadata) ? Integration with XMPH Capio supports a variety of output options including PDF, single and multipage TIFF, JPEG, PS, EPS, PCL, text, XML and HTML. Capio archives local documents, locates documents on the network,

and can send documents to an e-mail address or to a non-supported e-mail
