The aim of this study was to evaluate the long-term outcome of the first- and second-time balloon dilation (BD) of aortic stenosis (AS), both associated to valve replacement. The study included 80 consecutive patients who underwent surgical aortic valve replacement (SAVR) for severe AS and balloon dilation (BD) of the stenotic aortic valve. Patients were assigned to two groups according to the number of times that they underwent BD (group I = first-time BD; group II = second-time BD). The mean follow-up duration was 10 ± 2.2 months. Demographics, clinical findings and echocardiographic data were similar in the two groups. All patients were submitted to SAVR at a mean of 28 ± 12 months after BD. In-hospital mortality was similar in the two groups ($p = 0.9$). A greater amount of residual and asymptomatic AS was observed in the first-time BD group ($p = 0.02$ and $p = 0.05$, respectively). During follow-up, hospitalization for any cause was similar in the two groups. At the end of follow-up, the incidence of death, stroke and hospitalization was not different between the groups ($p > 0.05$). According to our results, BD is an effective treatment for patients with severe AS in terms of safety and mid- to long-term outcome. Single BD is an effective approach associated to a reduced rate of residual and asymptomatic AS. © 2015 Wiley Periodicals, Inc d0c515b9f4

I've been using FlexBuilder 3 till now. I can't find any updated version of FlexBuilder to use with Intellij 12 and Eclipse Kepler. So my question is: What's the best, or at least, the recommend (?) toolset to use with Intellij 12 and AS3? Thanks. A: FlexBuilder is no longer being updated, but once you have installed it you can use it with the same tools that are in IntelliJ and Eclipse. There are other free IDEs such as FlashDevelop which are also available. I've used FlashDevelop before and it is very easy to use with not so much learning curve. And it even supports debugging.
