It's true that no doubt file renaming softwares can help to make your life easier. And to get things right, just sort your files on time, subject, author, and other relevant attributes to easily rename them. But to get the same results on the application is a different story. Because when you need to quickly process a lot of files at once, using a batch renaming tool is the best solution. For this case, if you're looking for something with swiftness, ease of use, and low processing power, A-PDF Rename is the best software you can get. A-PDF Rename User Interface: It's very simple. You should know very well how to use simple batch renaming tools like old days. It just has a limited list of features. But it has its limitations as well. You can only import files, rename them, and export them. They can't go through the filtering process. Nor can you keep a track of progress and the progress bar will show you how far the files are done. Features: It's just a simple tool and doesn't come with all fancy features of a classic renaming tool. But it has one feature that many other renaming softwares lack. It handles the quick processing of a large number of files from the folder. And for this, it organizes them into three folders with subfolders. There's a small list of options available, including Default parameters, Number of Files, Number of Seconds, and Reset Synonym. From there, you'll be able to specify all the attributes in the form of textboxes. The names are entered by you as follows: - Author: Enter the author's name. - Description: Enter the description of the file. - Author: - Subject: - Creation Date: - Modify Date: - Other properties: You can also specify the folder and input destination. A preview window shows you the preview before renaming, and there's also a log file that contains all the information regarding the process that you will need to have an evidence to resolve any problem. Also, if you need to back up your files before proceeding with the name changes, you can do it. Just be sure to have lots of space on your disk. A-PDF Rename is a simple to use tool that is perfect for those who want to quickly rename a large number of files. A-PDF Version Control is a central repository for your
