I put a display up on my door in the office. It's a little old (1980s) LCD display. The monitor comes out of a Fujitsu Icon server. When I installed CrystalControl I didn't know it was going to be so freaky. I had to laugh when it loaded and came up with a display showing the contents of my window table (it was empty). It took me five minutes to figure it out and figure out how to set it to display the information I wanted. It's a simple program with lots of functionality. The capability of displaying tons of data on a display is one of the reasons I decided to continue using it. I
