Next you have to figure out what you want to do with the image you're working with. If you're new to Photoshop, the first design is usually fairly basic, such as resizing and cropping an image. You can do basic tasks like that using the Edit Basic Image window (see Figure 2-3). NEW YORK — Speaker Paul Ryan spoke to reporters about Tuesday's plans for the annual Address to the Nation on Wednesday. The Wisconsin Republican responded to a previous report that suggested that President Donald Trump used a foreign server to conduct his business and to the president's recent misleading statements about the Alabama special election race. When asked if Trump is cooperating with special counsel Robert Mueller's investigation, Ryan wouldn't answer. But the speaker reaffirmed that Trump will not be able to impede the investigation. "We have a special counsel overseeing the investigations. We don't want him to be hamstrung. But what we will do is make sure it is carried out properly," Ryan said. "He will not be able to impede the investigation, and we will make sure it is carried out properly," the speaker added. Ryan didn't answer questions about Trump's immigration executive order, but the House Speaker did discuss his stance on funding the U.S.-Mexico border wall. The president has been insisting that he will not give up on his demand for the border wall, despite a Jan. 8 deadline imposed by Congress that he could not meet. "We have consistently said that we will not support funding for a border wall with Mexico. We will get the job done at the border through other means," Ryan said. "I've been consistent. I'm going to continue to be consistent. I think what's important is to follow through on the executive orders that were issued," he added. \* Area-based limits not covered by the existing guidelines. \* Committee Note \* User needs to know if the planned limit is within the prescribed range or area-based limit. \* For those standards that prescribe a limit, "area" is defined as that portion of the standard element outside of the standard element's element. \* For those standards that prescribe

I could of course add a 'top:'middle' and 'bottom' to the css rule... but does someone know if there is any way of forcing it? Thanks A: Have you tried using the pointAt option? It looks like your only other option would be to adjust the css on the element itself. at: 'right center' should be: at: 'right center', Edit If you wanted a top and bottom margin, just put them into the CSS rule. You would need two lines for left and right: left: '+30px',
