## **What's New in the NTONYX Stylizer?**

NTONYX Stylizer 1.0 is equipped with an innovative technology, allowing to

transform MIDI-sequences automatically in real-time, without the need for a computer. This technology is based on an original method of modeling, "to conduct" the MIDI-sequence dynamically. The user of the program has only to change parameters, when necessary, to obtain a feeling of an "instrument" performance. Moreover, NS1.0 is a free, functional music editor that allows you to fix the pitch of notes, change volume Accents and the Depth of Modulation (Pitch wheel variation, Shifting, Mode switching, etc.). This technology is aimed at experienced musicians, amateur DJs and independent producers. NTONYX Stylizer users are able to control the parameters of the "understanding" algorithm of our program in accordance with the following options: YOUR MIDI FILE: 1. The Analyze MIDI File function allows you to choose (from a list of several types of models) the style of your musical material and choose a track, which determines the list of all elements to be transformed. 2. It is possible to specify the type of model for the song -- a special approach to the song, with the minimal or maximal change of parameters. 3. The track "sweeping" mode allows you to specify which parts of a song you want to set the parameters for and allow you to choose the "stretch" mode of operation of the modifications. NOTE: 1. It is possible to select full-automatic operation, or to set time parameters. 2. The "sweeping" mode is configured depending on the type of model. Ntronicus Ntronicus PA - On-stage performance midi.se This is a split from the 2-track demo featured in part 3 of "Ntronicus" This demo features a live bass performance with an organ prelude and a solo funk track, both triggered using midi controls. Ntronicus features more than 90 sounds, with 256 patches (instances) to be triggered, controlled and gated via midi. Much like a synthesizer, each patch contains its own presets, with over 20 with preconfigured settings for our leading sound engine. You can further manipulate these patches using midi controls. For the experienced user, you can also get creative and "edit" the presets of individual patches to fit your own unique sonic vision. Ntronic
