Prickly Pear Cactus Branding This product is no longer available.

Continue shopping at As Seen On TV or click below to find similar products. This was a great idea for a cake topper.

The shape and size I was looking for; plus it is a cactus and I really like the design. But the edges are a little rough and I would like to have the edges smoothed over like the edges on a cake. It is clear that you can't smooth it over very well, so I just sanded it off with a 300 grit sandpaper and it smoothed it out quite a bit. Overall it's a good cake topper. My darling, If only I could describe how sweetly you wrapped Your love around my heart. Your welcome kisses on my forehead, never fail to thrill. As I go out of the house now, giving a smile, I know that I can look forward to seeing your sweet smile. Happy Birthday my dear. HAPPY BIRTHDAY ESMERALDA. There are no words for how much I love you. Words are such weak things but thanks to them, I have been given the power to cherish you forever. I love you so much Esmerella. I just cant be how I am without you. I just hope that you know I love you all the time even when you are doing nothin to me. I want to come and see you. Do you want to have a picnic? How about when the sun shines? I cant wait for you to be my wife and make me so happy. Make a wish and ask God to grant it. Head of marketing at Alliance Casino, Sean Collins, has died suddenly at the age of 48, after apparently falling ill at work. A press officer from the casino in Douglas, Isle of Man, confirmed that Collins died at Tyne Hospital in Kent, on March 6th, after spending three days in hospital. Collins was Head of Marketing at Alliance Casino, and was the nephew of Keith (The Bishop) Collins, 648931e174

I have a Logitech mk340 cordless mouse and it has died. I have downloaded the driver from Logitech web site but it is in the wrong format. It is.

The present invention relates to a yarn brake device used in spinning machines for open end spinning, particularly the spinning machines as disclosed in Japanese Patent Application Laid-Open Publications Nos. 179588/1988, 57891/1988, 205739/1988 and 57348/1988. In

conventional spinning machines, when threads of spinning are to be stopped, the yarn brake device is generally provided in a narrow feeder portion where warp threads wound around a bobbin are made to enter to a section after the spinning machine. FIG. 1 shows a conventional yarn brake device. The yarn brake device 50 comprises an arm 51 moved in directions indicated by arrows by a cam mechanism 52 in response to the movement of a yarn guide 53 as a brake control member. The brake mechanism is comprised of a wedge 54 which is to be inserted into a wedge gap formed between the arm 51 and a fixed member 55 so as to move the arm 51 up.

Upon the movement of the arm 51 and the wedge 54, a yarn 16 wound around a bobbin or a supply bobbin (not shown) is allowed to enter a nip formed between the arm 51 and the fixed member 55, thereby braking yarn thread. The yarn 16, upon being brake by the brake mechanism, is stopped in a yarn stretched and lowered state until it enters a cutter 91. However, the conventional yarn brake device has problems that yarns 16 are cut by the cutter 91 which is provided at a forward end of the arm 51 as shown in FIG. 1, causing the yarns 16 to be broken.

Further, the yarns 16 are drawn out from the machine, thereby resulting in broken yarns 16 being mixed in the yarn which is to be
