Offense is easier to score, thanks to both set pieces and open play situations. Movement has been upgraded, and what players can do with possession and the way in which the ball can be moved around the pitch will help take your football game to a whole new level. DEFENSIVE STYLE Team AI improves to truly reflect how a football team plays, and every defender will now act more like their real-life counterparts. Defenders will tackle more effectively while maintaining their composure, and they'll be more aware of their teammates, making the defensive side of the game even more authentic and tactically challenging. The new Defensive Style system now also makes the most of the strength of individual defenders as it ranks players in a number of different styles. The style rank is affected by how good a defender is at defending one-on-ones, heading, tackling and aerial duels, so you now get to decide which Defender Style you prefer, making the game even more tactical. Fifa

The goals you'll get to achieve in each type of defense have been personalised to show how a player would actually perform in that particular press. DIRECT INPUT Being able to make slight adjustments with the new interactive steering wheel, put away the controller and become part of the match is at the heart of FIFA's new Direct Input system. Since your movements on the pitch will now impact gameplay, the new system will make sure that you play like a real-life football star, regardless of whether you're controlling a full-field or playing with the video assistant function. To ensure that the new Direct Input is as intuitive and fair as it is enjoyable, the system will detect how far your controller is moved from its centre during gameplay, as well as your player's speed and body posture, all of which will be used to adjust the speed of the passing, shooting and dribbling on the pitch. A SMOOTH NEW WAY TO PASS FIFA's ball control system is also receiving a major overhaul that gives players a more realistic way to move around the pitch, as you'll now have an
