No. 6,805,605, which issued to K. Washio, et al., on Oct. 19, 2004, discloses a throttle arrangement for a marine propulsion device. The throttle arrangement includes a throttle shaft disposed inside a valve body. A valve plate is positioned in the valve body and is coupled to the throttle shaft. The valve plate is positioned inside the valve body so that the throttle shaft extends in a longitudinal direction. The valve plate is rotatable on the throttle shaft to control the flow of a fuel/air mixture through a throttle passage
