Although the underlying mechanisms are unclear, the EuD dosage used in this study showed excellent effects. On the other hand, even at a low dosage, EuD administration significantly increased serum free amino acids, i.e. lysine, ornithine, and arginine, which are important energy sources for the body. Free amino acids have been shown to induce mitochondrial biogenesis in skeletal muscle \[[@pone.0196056.ref028]\]. Our data suggest that EuD administration activates mitochondrial biogenesis and also maintains mitochondrial functions, which is supported by increased mitochondrial complex I and II activities. Our results suggest that free amino acids are involved in the stimulation of mitochondrial biogenesis. EuD is a free amino acid mixture with antioxidant and
