an element of unfair trade practices; and (4) that the illegal conduct caused either actual injury to a plaintiff or a threatened injury for which plaintiff seeks an injunction. 4 Avnet argues that the district court erred when it denied Avnet's motion for summary judgment based on the statute of limitations. The district court determined that Avnet's alleged violations of the Minnesota Sales Act were continuing in nature and, therefore, were not barred by the statute of limitations. *Chittenden Trust Co. v. Avco Delta Corp.*, 86 F.R.D. 593 (D.Minn.1980). We agree. 5 Because the plaintiff's unjust enrichment claim is premised on the same alleged violation of the Minnesota Sales Act which forms the basis of the plaintiff's claims under the Minnesota Unfair Trade Practices Act and the Minnesota Antitrust Act, the plaintiff's claims under the Minnesota Sales Act are not preempted by federal law. We therefore affirm the district court on this issue.

Venlafaxine for depression. Depression in older adults is particularly difficult to treat, and the rates of depression in older adults have not improved over the past decade. In addition, the previously available antidepressant medications for the treatment of depression in older adults have been associated with a variety of adverse effects, have not been evaluated as well in older adults as they have been in younger adults, and may produce sedation. In this review, we provide a critical assessment of the preliminary research that led to the approval of venlafaxine for the treatment of major depression in older adults.

Q: Inline-block inside a span? How do I get inline-block to work inside a span? bar bar CSS .foo span.bar { display:inline-block; background:red; height: 20px; width: 40px; } Note the height of the bar elements doesn't work. As soon as I put the span (or any other tag) as an element around the tags the height works. A:

Topics Featured in Development Peter Alvaro talks about the reasons one should embrace obscurity in a developer career and how to get started with obscurity for your own projects. He also mentions things like the future of the web and bots. Featured in AI, ML & Data Engineering Today on The InfoQ Podcast, Wes talks with Katharine Jarmul about privacy and fairness in machine learning algorithms. Jarul discusses what's meant by Ethical Machine Learning and some things to consider when working towards achieving fairness. Jarmul is the co-founder at KIProtect a machine learning security and privacy firm based in Germany and is one of the three keynote speakers at QCon.ai. Featured in Culture & Methods Organizations struggle to scale their agility. While every organization is different, common patterns explain the major challenges that most organizations face: organizational design, trying to copy others, "one-size-fits-all" scaling, scaling in siloes, and neglecting engineering practices. This article explains why, what to do about it, and how the three leading functionalities of software—components, collaboration, and containers—can help. Cloud native computing provides a promising and innovative solution for the challenges facing information technology (IT). In this article I look at how the conceptualization and deployment of services can benefit from recent technological developments that will only make things easier and more straightforward in the long run. Despite all the advantages that cloud native solutions bring, in this age of high speed and scale, it is inevitable that some clouds are faster or more powerful than others. In this article I will examine the three main cloud native approaches based on five strategic questions to help understand the intricacies of cloud computing. With the ramp up of the movement towards cloud native computing, the testing of new products in the cloud is unavoidable. In this article I will explore three strategies to improve the quality of the testing experience and how they can help identify the return on investment for the cloud native community. The three key pillars of cloud native computing are containers, components and microservices. Each of them has great benefits, but they should be

utilized as part of a whole rather than individually. This article will explain why the different components of cloud native computing and how they can benefit from each other. In this article I will demonstrate why taking the cloud native approach is the best way forward and discuss the three main pillars of cloud native computing: containers, components and micro
