Keystroke POS is a powerful tool designed for people of all skill levels. All of its features can be used by those people that have no prior experience with software. Keystroke POS's main advantage is that it is a simplified version of the more feature rich and expensive versions. It also allows you to manage all of your sales, inventory and bills with the click of a button. Unlike most POS programs, it is incredibly easy to learn and use. There is no need to worry about setting up special programs for different vendors or departments. Keystroke POS is totally oriented for everyone and everything. Features: User friendly design Equipped with smart search and sort features, Keystroke POS offers a comprehensive search of items, people or events. Also, you can sort items into many different ways. Apply cost on sale or purchase You don't have to wait until the order is complete to apply the cost. You can apply the cost to the sale of any existing order in a simple process called Cost on Sale. All the costs can be applied either to the original item or a different item. Sales set up Start a sale with the click of a button. You can list the item, the quantity, the sale price, who will get the item, date etc. You can also set the time limit and set the reminder. Purchase set up Purchase new items in seconds and preview the item. Also, you can add quantity to existing sales order. You can also apply the purchase fees and mark items as final. Applying cost Applying costs to items is very easy and you do not have to do anything on the software. Just find the items you want to apply the cost to, select it and you are done. Customer list report Print customer list reports with great detail in seconds. User-friendly interface supports most popular printers, you can select a range of sales, or you can print only the items you are interested in. Bills set up Bills are the easiest to create in Keystroke POS. You can just select a bill with the click of a button and add the items in a minute. Sales journals Set up sales journals by applying the sales with the click of a button. You can set the start and stop date in any month. Sales receipt Sale receipts are created in seconds and you don't have to do anything on the software. Just print them and that's it. One of the best things about Keystroke POS is that all the

Keystroke POS Download Total controller is a comprehensive and multi-functional POS software. As a result, it allows you to control all the major aspects of a business. Specifically, the application allows you to manage sales, inventory, employees and vendors, price and sales history, journals, reports and much more. The software also offers a wide variety of interface options to make controlling your business easy. In this section, we will review and evaluate Total controller. Ease of use and graphical layout As we have already mentioned, the application is divided into several parts, the most important of which are: Sales, inventory, journals, reports Each of these sections is equipped with a separate window. All these windows can be collapsed and expanded as needed. Some of them also include filtering options. For example, the sales window has a filter for the most current day, a filter for the corresponding month and a filter for the current year. The inventory window is customizable, so you can select the size, color and quantity of each product. Similarly, you can have a customisable window for your reports, journals and invoices. During our tests, we found the application easy and intuitive to use. Moreover
