Environmental Chemistry. 0 Lecture notes. Course Description: Environmental Chemistry is the study of how the environment reacts to the impacts that humans make. It is a field of science that focuses on. Environmental Chemistry Lecture Notes. This is the third time that I have voted for him. I still get a good deal of pleasure watching him do his thing. Having said that, there are several areas in which I'd like to see him improve. Here are my top 5: - 5. Shear Strength and Durability One of the biggest criticisms of Chris Christie is that his leadership during Hurricane Sandy exposed his vulnerability. He was seen as a bit of a gaffe machine, who had few answers for questions about what went wrong in his response. How was it that his administration was not prepared for a storm of this magnitude? How was it that the Governor's staff failed to warn residents of New Jersey? How did he handle the crisis? Did he apologize? These questions have plagued him ever since the storm. It's hard to believe that the pressure he felt from having to answer questions about Sandy had anything to do with the Governor's "scathing style" of government. I'm not sure if the Governor really likes to listen to criticism. That's okay. After all, he knows that he's pretty good at what he does. But I do know that we've reached a point in his career when he
