I am creating a custom button in Visualforce page which calls a controller method. Below is my controller code. public PageReference Logout{ PageReference logoutPage = page.Logout(); return logoutPage; } Below is my button code in the visualforce page Here my requirement is that, onclick of custom button I need to redirect to a new custom visualforce page. If I am using standard button it redirects to the new visualforce page on click. But when using custom button it does not even call the controller method. A: The reRender attribute doesn't use a standard action, but the action attribute instead. You also cannot have immediate="true" on your VF page and a reRender on your controller, it will not work. You will have to specify immediate=false on the VF and re

What's New in the?
