RSLogix5000. Net Controllers (939-R) manual.1. Field of the Invention This invention relates to a microstructure electronic component, such as a capacitor or inductor. 2. Description of the Related Art A ceramic capacitor, for example, is comprised of an element having a pair of inner electrode layers, a dielectric layers and inner electrode layers, and then forming a pair of outer electrode layers in the end portion of the resulting laminated structure. When a laminated structure is formed in such a manner as to have a large thickness, there is generated a problem in that the element size is increased. This is because, during formation of the outer electrode layer is subjected to heat treatment for stabilization. In order to avoid the aforementioned problem, the outer electrode layer
