Fifa 22 Features Key:

- The new era of player movement - **FUT 22** pioneered a progression system that simulates authentic player movement. Now, only one pass gets you into the opponent's half. Fewer headers rule the skies and fewer throw-ins get you into defensive shape. The skilled players will be readjusting to a new era of football.
- Crowded Outrun lanes - Make your muscle memory a competitive advantage and dominate goal-scoring situations with new movement and run mechanics. Each player continues his run upon completing a tackle. Every defender runs out and challenges the ball carrier in a rapid game of cat and mouse. This dynamic style requires precision and tactical decision-making to break the opposition down.
- Tactical Challenges - Make every player's traits and skills the foundation for unlocking a series of challenging in-game modes and training sessions.
- Inverted Stadiums - The FIFA Booth series comes to a new level as the ball gently rolls out of play in authentic stadiums.
- Accelerated Retouch - A wider camera angle improves visibility in your industry-leading retouching tool, making it easier to see and work on finesse shots like volleys and curling shots.
- Huge improvements in Pro Clubs - Make the right player decisions and fans will be more vocal than ever in their excitement and confidence as top European football gets a revamp in **FUT 22**.

FIFA is a football (soccer) simulation series created by Electronic Arts (EA). It was created to provide players of all ages and skill levels with a football experience that is accessible and fun. FIFA, which stands for For Interactive Football, has been played around the world for over 20 years. What is FUT? FUT is EA's official monthly football simulation. It is delivered through live match days, match replays, and FUT Champions. Download FIFA 22 on Windows Store. FIFA 22 Features

FIFA 22 has improved game technology and delivers improved player intelligence, making the game feel more natural, intuitive and playable. In FIFA 22 you will see the ball react differently to a player, you will be challenged to make unmissable saves and you will feel more connected to the action. Natural Touch This feature works on both new and existing franchises. In this demo we see the improved ball physics when using the touch control modes. Instead of the ball bouncing as it does in FIFA 17 the ball moves as you would expect. This feature is fully enabled in the FUT mode. New

Improvements in Player Behaviour A player makes a world of difference when it comes to how the ball behaves. In FIFA 20 a player's awareness of the ball was improved. In FIFA 21 the ball would respond to the player better. Now it is even more intuitive. How a player runs and how they react to a shot is now more precise.

Pitch and Surface Improvements As part of the Natural Touch technology, FIFA 22 improved the surface and pitch rendering quality. Also as part of this improvement, as a result of the new Player Behaviour, the game will now switch to using a more realistic colour palette for the pitch and the grass.

Match Engine Improvements The match engine has been improved in several key areas to support the expanded match and players and surface features. AI (Intelligent Assistant) and pitch logic for defensive positioning have been expanded to make the game more challenging when defending as well as more realistic.

Improved Intelligence in Gameplay In the various training areas there will be increased information as you progress through the training mode. This will help you to develop your game through improving your technique and decisions in game. This will be an added feature for FUT Champions and Ultimate Team users. **Other features
