“The final step of the match brings us to the final score. We took all the data to make the simulation of the world’s leading football simulation and we were able to fix match dynamics,” said Richard Hillelson, Senior Producer at EA SPORTS. Highlights of the game include: “Intelligent” AI The "Intelligent" AI has been enhanced to watch every player in the pitch using a new Attacking Intelligence. Players no longer have to rush up for a ball. They can work on perfect passes and open up scoring opportunities. They are more skillful and confident in their decision-making, making them quicker to run forward after a ball is won. They are now faster in running up to the ball and will wait for players in their team to open up space for them. The intelligent AI enables the players to be “perfectly” positioned when breaking forward. “Perfect” individual skills and traits Intelligent AI and enhanced Attacking Intelligence make the world’s top players realistic. FIFA 22 shows how a skilled player can deceive opponents and score after cunning one-on-one dribbling. All of the game’s 270 players have been given new individual skills and traits. Players are now more agile and smart when running at the back post to score, as well as showing greater perception when receiving long passes. “Human. New.” Player models FIFA 22 is the biggest and most realistic football game ever created. FIFA 22 shows the world’s best players in a natural way and enables the player to see himself with his own eyes, like never before. Players now look exactly like themselves – the way they move. FIFA 22 introduces “HyperMotion Technology”, a feature that leverages motion capture data collected from real players playing a complete, high-intensity football match in motion capture suits. HyperMotion Technology, powered by EA SPORTS’ proprietary ANTECH algorithm, brings more realism to player animation, delivering greater responsiveness, more natural player movement and enhanced AI. FIFA 22 introduces “HyperMotion Technology,” which leverages motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay.EA SPORTS’ Head of FIFA
