This function has revolutionized the market for retouching images online because it allows for both professionals and amateurs to retouch their own images. You can use Photoshop to create images in a variety of ways. With a bit of practice, you'll be surprised at just how much control you have over your images, with what you can do to them, just by using Photoshop CS3. If you do nothing but apply simple contrast and brightness adjustments to your images, it's not a big deal. But if you want to drastically change the look of your images, or if you want to do it in such a way that the result looks flawless, Photoshop is the right tool for the job. You can use a number of techniques in Photoshop CS3 to really make images pop, from color correction to black-and-white conversion. You can even use multiple layers to create spectacular effects with your images.

A 5-year-old boy from Georgia was struck and killed by a bulldozer while playing in a cemetery at a cemetery, according to officials. Emergency officials said the boy was playing in the cemetery on Thursday around 1:30 p.m. when he stepped into the path of the tractor that was hauling construction materials, according to the Georgia Bureau of Investigation. The boy was taken to Grady Memorial Hospital in Atlanta where he was pronounced dead. Investigators said in a statement that crews will do everything possible to avoid similar incidents in the future. "Playing in cemeteries is not a good idea, we understand that, but it's no excuse," said Assistant Chief Henry "Hank" Henderson of the Atlanta Fire Rescue Department. "It's just something that is very dangerous, and it should be avoided at all times." Family members said the boy was the son of a contractor. "It's a tragic and sad situation," said family attorney Cal Smith. Officials said they were still trying to understand how the accident occurred. FILED NOT FOR PUBLICATION APR 11 2011 MOLLY C. Tip If you need to select pixels in an image that are very similar to the mouse cursor, click and hold the mouse button on a section of the image and move the cursor over different pixels until you find the one you want. You can then click on a single pixel that you have selected, and the Magic Wand will select that pixel. To select pixels based on their relative similarity to the cursor, follow these steps: 1. **Select the Magic Wand tool and click and hold down on an area of the image you want to select**. The Magic Wand dialog box appears, as shown in Figure 14-3. You can use this dialog box to adjust the parameters that are most important to you. The box on the left side of the dialog box has the settings that control the most important settings for the tool
