upon reaching the first level of the first planet, it's time for you to head off to the arena. getting into the arena isn't easy as it takes place in a huge battle raging in the background, the music has to be carefully managed and there are three phases to the match: a tutorial, where you choose a side and get a briefing on the game mechanics; a 'war' phase, where the rebels and the empire go at it; and a 'recover' phase, when your forces are re-balanced and the battle re-roled. the tutorials do a good job of giving a brief introduction to the basic controls and they slowly build up the basics so by the time you're entering the arenas you should be able to figure out what's going on. the music was fairly well composed, although it's not a big star wars fan (i'm not either) and so may not be to your taste. the rest of the art is quite good, although one of the missions - the rescue - has a rather short death sequence that all but wiped the screen clean. it takes a fair bit of practice before you get to the point where you can be calm enough to survive and it doesn't really get easier, no matter how many times you play it. this game is designed around a single player campaign. the later missions are fairly lengthy but may depend on your skill level. the quality of the game varies considerably from game to game, but there are solid base levels that are beginner friendly. the whole thing combines well, and there is some strategic element to the game that you might not expect to find in a pure real-time strategy game. some of the units are very powerful, but then again there are others that are weak and it's up to you to figure out how to employ them. you can speed up the game by finding routes through the airlocks and taking part in red alert missions - when you're in the middle of a mission, tapping the enter key rapidly will switch you to a red alert mission that will let you complete the next series of missions. 5ec8ef588b
