

# Find Out how to make a fence gate in minecraft

Minecraft is a sandbox video game that allows players to build and create their own virtual world. One of the many structures that can be created in Minecraft is a gate. A gate can be used to keep mobs, enemies or other players out of a specific area. In this guide, you will learn **how to make a fence gate in minecraft**.

## Step 1: Gather materials

The first step in creating a gate in Minecraft is to gather the necessary materials. Here is a list of what you will need for a gate:

Wooden Planks (6)

Sticks (4)

Iron Ingots (2)

### Step 2: Create a Crafting Table

Before you can create a gate, you need to have a crafting table. To create a crafting table, you will need to gather four wooden planks and place them in a square shape in your inventory. This will create a crafting table that you can use to craft other items in the game regarding **how to make a fence gate in minecraft**.

## Step 2: Create Wooden Pressure Plates

Wooden Pressure Plates are used to activate the gate when someone steps on them. To create wooden pressure plates, you will need two wooden planks and two sticks. Place the two wooden planks in the first and third row of the crafting table, and the two sticks in the second row.

## Step 3: Create Iron Bars

Iron bars are used to create the framework for the gate. To create iron bars, you will need six iron ingots. Place the six iron ingots in the crafting table in a straight line, from the first row to the third row.

## Step 4: Create the Gate

To create the gate, place two wooden pressure plates in the first and third row of the crafting table, and four iron bars in the second and fourth row. This will create one gate. You will need to repeat this process regarding **how to make a fence gate in minecraft**.

## Step 5: Place the Gates

Once you have created both gates, you can place them in the desired location. To place a gate, simply right-click on the block where you want the gate to be placed. You can also place the gates on top of each other to create a larger gate.

## Step 6: Connect the Gates

To connect the gates, you will need to place a redstone torch next to one of the gates. The redstone torch will activate the gate when it is powered. You can also use redstone dust to connect the gates and activate them.

## Step 7: Secure the Gates

To secure the gates, you can add locks or padlocks. To create a lock, you will need to gather iron ingots and place them in the crafting table in the shape of a lock. To create a padlock, you will need iron ingots and string. Place the iron ingots in the shape of a padlock in the crafting table, and add the string in the center regarding **how to make a fence gate in minecraft**.

## Step 8: Decorate the Gates

To decorate the gates, you can add flowers, banners, or other decorative items. You can also paint the gates with different colors or patterns.

## Step 9: Test the Gates

Once the gates are secured and decorated, you can test them to ensure that they work as intended. Try opening and closing the gates, and make sure that the redstone torches or redstone dust are powering the gates correctly.

This shall clear your doubts on **how to make a fence gate in minecraft**.
