

# Learn how to download from youtube

The most popular video-sharing website, YouTube, contains a vast library of videos that range from entertainment to educational content. Sometimes, you might find a YouTube video that you'd like to download or save to your device for offline usage or later viewing. Although YouTube does not permit direct downloads of its videos, there are still a number of ways to download YouTube videos. In this article, we will discuss different techniques to [download from youtube](#).

## Methods To Download Videos From Youtube

### Download YouTube Videos with a Browser Extension

You can download YouTube videos using one of the many downloading programs that are accessible online. The best method to **download from youtube** is to use a browser extension. Video DownloadHelper is the most widely used browser extension for YouTube video downloads. Both Google Chrome and Firefox support it.

Follow these steps to download a video using Video DownloadHelper:

1. You should add the Video DownloadHelper plugin browser.
2. Go to YouTube for the video you want to download.
3. On your browser, click the Video DownloadHelper icon.
4. Choose the video download format and quality that you want to use.
5. Click the download option.

### Download YouTube Videos with YouTube Premium

You can **download from youtube** to view later if you subscribe to YouTube Premium. Following are the methods to download a YouTube video using YouTube Premium:

- Open the YouTube application on your tablet or smartphone.
- Look for the video you wish to download.
- To start the video, simply tap on it.
- You'll notice a Download option next to the video player. Touch it.
- Select the video format such as, 1080p, 720p, 480p.
- Your device will begin downloading the video.
- You may access the video from the Downloads section of the YouTube app once the download is finished.

### Download YouTube Videos with a Downloading Tool

Another way to download youtube videos is to use the Y2mate YouTube Downloader. You can download YouTube videos in a variety of formats and quality levels using this free tool.

The instructions below explain how to use Y2mate YouTube Downloader to **download from youtube**:

- Copy the YouTube video's URL so that you can download it.
- Visit Y2mate YouTube Downloader's website.
- Insert the URL into the search field.
- Choose the video download format and quality that you want.
- Choose "Download" from the menu. Your device will then begin downloading the video.

## Download YouTube Videos with VLC Media Player

YouTube videos can be downloaded using the free VLC Media Player. Follow these steps to **download from youtube** using VLC Media Player:

- First, launch VLC Media Player.
- Choose Open Network Stream from the Media menu by clicking the menu button.
- Next, copy the URL for the YouTube video you wish to download.
- Copy and paste the URL into the Network URL box, then press the Play button.
- When the video is playing, do a right-click and choose Save As.
- Choose where on your device you wish to save the video, then click the Save button.

## Things to Remember While Downloading YouTube Videos

Be careful of copyright laws: It's crucial to keep in mind that downloading copyrighted videos without authorization is prohibited. Verify that you have the authorization needed to download and utilize the video.

Verify the video quality: Before **download from youtube**, make sure to look at the video quality first. Certain videos might not be high definition, and watching a low-quality video that you downloaded might not be the best experience.

Employ a reputable downloader: If you want to download YouTube videos, be sure to use a reputable downloader. Certain websites and programs can have viruses or malware that might damage your device.
