## How do you get started with this template?

API is used mostly these days and it is used for both personal and business needs. API can be built easily by using various tools that are available today in the market. It is important to create efficient and innovative projects of software applications that can help to solve the pain points of your customers.

- **Hoppscotch:** It is an open-source platform of API development that is fast and lightweight for copying responses and sending requests in real-time. This tool offers some HTTP methods including POST, PATCH, GET, HEAD, DELETE, PUT, CONNECT, OPTIONS, etc.
- **Postman:** If you want to publish and build API together then you can use this tool by downloading the application on a desktop or by signing up. It is a platform of API development used to build APIs and simplifies each step covered in the lifecycle of API as well as streamlines collaboration effectively to create better and faster APIs.
- **Swagger:** It can simplify the development process of API for teams, users, and enterprises with its open-source and professional toolset. It also helps you document and design APIs and streamline workflow with the specifications of Open API.

**QUIRINUS SOFT**  
7 Gibson PI, Stanwell  
England, (TW197NW), (UK)

A banner for Quirinus SOFT's Award-Winning SEO Services. It features a dark blue background with a large white circle containing a hand holding a glowing lightbulb with 'SEO' written on it. Surrounding the lightbulb are various SEO-related icons like 'Social Media', 'Link Building', 'Competitive Analysis', 'Local Marketing', 'Keyword P', 'Page Crawl', 'Heading Tag', and 'XML Sitemap'. The text 'Award-Winning SEO Services' is prominently displayed in white and orange. The Quirinus SOFT logo is in the top left corner. A '24/7 SERVICE' icon with a woman is on the left. A 'CONTACT US' button is at the bottom left. A dark blue bar at the bottom contains the website 'https://www.quirinussoft.com/' and the phone number '44 752-0640-140'.
