Foundation classes for Math and science

Math & Science:

The Science and Mathematics Foundation Courses aim to provide students with a solid grounding in the fundamentals of these fields. This supplementary educational establishment both prepares its students for future standardized tests. Also, prepares them for future competitive examinations. Most standardized tests in the world need a certain level of skill. Which is why we concentrate on the subject organization.

It's a bridge for those who want to skip high school and go straight to college. So, equipping them with the skills they'll need to succeed. Mathematics and science are taught to our students in our introductory classes. Training is accomplished through task-based learning, encouraging a learner's mindset and approach shift. Instructional methods and hands-on exercises are both vital parts of training.

The child's capacity to study and gain subject-specific meta-knowledge will be bolstered. We use Systematic Analysis Framework to make our training consistent, high-quality, and relevant.

We strengthen children's comprehension skills so they can take part in class. Good education produces well-rounded persons with a firm foundation in various subjects. Besides, kids learn how to deal with stress and conflicts. Clear and informative teachers in our society can teach kids knowledge and social skills.

Foundation Classes for Maths and Science at Sahara Edulive, Dubai:

We at Sahara Edulive in Dubai are dedicated to educating the next generation. We are preparing them for a lifetime of learning. Our Maths and Science Foundation Classes in Dubai are structured to give students a firm grounding in both topics. Students are given the tools they need to succeed in education. Also, to build a lifetime love of learning through interesting classes taught by qualified teachers.

Maths Foundation Class:

Students in our Maths Foundation Class will develop a strong grasp of mathematical ideas. It is done by exploring the underlying structures of mathematics. Our course offerings align with global benchmarks. They are adapted to the specific requirements of students in Dubai.

Topics of Primacy:

Numerical literacy includes working with whole numbers, fractions, and decimals. Also, performing the four fundamental arithmetic operations (add, subtract, multiply, and divide).

Geometry studies geometrical figures, including curves, straight lines, and angles.

Introduces length, mass, and volume measurement systems.

Recognising and expanding sequences and patterns in data.

Enhancing analytical and logical reasoning through mathematically-based real-world problem-solving.

Science Foundation Class:

In our Science Foundations course, students will set out on a thrilling adventure to discover the natural world's secrets. Students will get a scientific outlook, and an interest in the world through engaging teaching and experiments.

Topics of Primacy:

Biology studies life and how it works, including individual creatures and entire ecosystems.

Physics focuses on learning the fundamentals of motion. Also, forces, energy, and the characteristics of matter.

Chemistry is the study of matter and its interactions with other substances.

The science that deals with Earth, the atmosphere, and the cosmos.

Learning to think like a scientist requires observation, experimentation, and analysis practice.

Methods of instruction:

Here at Sahara Edulive in Dubai, education should revolve around the pupil. Our seasoned faculty members use a wide range of instructional approaches.
